*A legal paradigm shift towards climate justice in the Anthropocene*

This term we focus the series on issues related to the law as a 'technology' of transformation relevant to various spheres including the political economy, gender and sexuality, education, labour, race, the environment, policing and other social issues. We invite critical engagements with the law (broadly defined as legislation, legal institutions, or social institutions governing action) as a conduit or hindrance to social change; the various ways individuals experience the law or engage with legal structures in their daily lives.
